Decra Lite Borders

Manufactured on Decra Glow polyester film and available in sheets of 460mm x 660mm, containing 13 strips of 35mm wide. Decra Lite Borders introduce a new dimension to decorative glass. When combined with Decra Lite roundels or a bevel design, they create a realistic stained glass effect which is quite stunning on fanlights, in conservatories and on door panels.

Decra Lite Endcaps

Manufactured on Decra Glow polyester film, Decra Lite Endcaps are available in sheets of 185mm x 290mm, containing 40 Endcaps 35mm square. Decra Lite Endcaps complete the new range of traditional designs from North Western Lead. Endcaps can be used in the corners of a Border design, within a Border, or even used in multiples as the central design on a piece of decorated glass.
